Google est mon ami et [Gratilog](http://www.gratilog.net) aussi

The screenshot shows the 'Javascript Collector v1.1' application window. The title bar indicates '201 Snippets Loaded'. The interface is divided into a left sidebar with a tree view of categories and a main right pane. The sidebar categories include Background Effects, Banners, Calculators (with 'Ohm's Law Calculator' selected), Cookies, Counters, Date and Time, Email Scripts, Forms, Games, Generators, Image Effects, Link Effects, Misc, Mouse Effects, Navigation, Redirection, Scrollers, Text Effects, Tools & Utilities, User Information, Window, Window StatusBar Effects, and Window Title Effects. The main pane shows the configuration for the selected snippet. It includes a 'Bribes de code' section with buttons for 'Ajout d'une brique', 'Rechercher une brique', and 'Paramètres'. Below this, there are fields for 'Catégories des bribes' (set to 'Calculators') and 'Nom de la brique' (set to 'Ohm's Law Calculator'). A text area contains the JavaScript code for the calculator, with 'Coller ce code entre <head> et </head>' above it. Below the code are 'Modifier le code #1' and 'Copier ce code #1' buttons. Another section for the body contains 'Coller ce code entre <body> et >' above an empty text area, with 'Modifier ce code #2' and 'Copier ce code #2' buttons below. A third section for the footer contains 'Coller ce code entre <body> et </body>' above a text area containing HTML form code, with 'Modifier le code #3' and 'Copier ce code #3' buttons below. A 'Notes/Commentaires/Autre Code' section has an empty text area and 'Modifier le code #4' and 'Copier le code #4' buttons. At the bottom, there is a 'Prévisualisation du code avec' section with four icons for different preview options.
