Une nouvelle version de Mempad vient de sortir : 3.40
Il fonctionne sans installation sur Win 7 sans problème.

<http://home.mnet-online.de/horst.muc/win/mempad.zip>

Version 3.40 - 16 February 2010

- New index sort: sorting siblings (nodes on same level with current node)

 - Index menu; Alt F12: sort ascending, Alt+Shift F12: descending

- Search window remains active (unless string found in index)

- New: Language support for user interface; see file: languages~languages.txt

- New: Main menu: MemPad / Language (changing language requires restart)

- Hotkey assignment handling (window) changed

- Search window a little larger to handle different languages

- INI file tweak: TextMargin (see Help: Tweaks)

- Bugfix: empty page sometimes showed previously viewed page

- Bugfix: Launching issue if not full path supplied

- Bugfix: aborting node background color selection

- Bugfix: refresh issue when replacing with nothing

- Window position also saved, if window not visible when MemPad closed
