Salut zorro51,

Si cela peut t'aider voiçi les fonctions d'UltraIso relevées sur le site de l'auteur.

Main Features

   *Can directly edit the ISO image file.

   *Can directly extract files and folders from ISO image file

   *Can add / delete /create new directory /rename ISO file image content.

   *Can make ISO file from hard disk document.

   Can create CD/DVD image from CD/DVD-ROM, maintain bootable information.

   *Can process the compact disc boot information, you can directly add/remove/extract boot image of the ISO image.

   *Supports nearly all known CD/DVD image file formats (.ISO, .BIN, .IMG, .CIF, .NRG, .MDS, .CCD, .BWI, .ISZ, .DMG, .DAA, .UIF, .HFS and so on) , and can convert them to the industry standard and widely supported ISO image format.

   *May directly set the file/folder to hidden attribute

   *Supports ISO 9660 Level1/2/3 and Joliet extension

   *Automatically optimizes the ISO image file structure, saves the disc space.

   *Supports the shell document type integration, Open Image files through double clicking them or the Right Click menu of the mouse with the open dialog.

   *The double window user interface is extremely convenient to use.

   There are rich add-on tools, you can create ALL in 1 bootable compact discs, CD/DVD image file management, even the virtual CD/DVD drive , those functions are really powerful.
