nouvelles infos sur le site ... Il semblerait que la fermeture soit définitive...

problème de droits ou de login entre les intervenants ?

Dear Users,

Philip Oldaker the major Tapin-radio programmer definitely closed the server. I'd understand him not wanting to work on the project but what I don't really understand is he doesn't even want to give me the login information to forpsi.com for me to be able to carry on claiming he owns rights to the domain and program but he ...wants to own something that no longer exists...

So we're finishing.
