2012/01/12 version 1.2.4

Added:

- The ability to set file extensions to load into menus.

- The tray notification which appears when the program becomes ready.

- The donation menu item and the icon in the About window.

Changed:

- To rebuild only the nested menus instead of rebuilding the entire menus when a change is made in the shortcut folder.

- Not to build the tray menu if the program is launched via a command line.

Removed:

- The Exit menu item when the program launched via a command line.
