Free SMTP Server 2.4 (free) 766Ko

Citation :

Free SMTP Server is a SMTP server program for Windows that lets you send email messages directly from your computer. It's very simple but very useful for laptop users traveling around the world and connecting their PCs to different Internet Service Providers in different countries. You can use it instead of ISP's SMTP server to increase your security and privacy.

<http://www.softstack.com/download/freesmtp.zip>

il m'arrive d'utiliser ce petit soft, que je trouve très pratique ...
mais S.V.P.

Citation :

Disclaimer: Free SMTP Server IS NOT A TOOL FOR SPAMMING and ITS NAME MEANS NOTHING. We do not support spammers and strictly forbid anyone to use Free SMTP Server for sending unsolicited spam email.
