Le téléchargement a marché pour moi et marche encore ce soir.

J'ai trouvé enfin les pages qui présentent les mises à jour

http://forum.copernic.com/index.php/f..._desktop-search-4-is-here/

Copernic is introducing the new version 4 of its desktop search product. The upgraded Copernic Desktop Search (CDS) further increases its competitive edge by adding new features and expanding its search capabilities.

The technology behind Copernic Desktop Search 4 was completely overhauled to add brand new search capabilities. By doing so, users can now benefit from features such “search within your results”, “Google Chrome™ integration to search favorites and history” and “additional refine search criteria” The new version adds full support of double-byte characters, which means that our users will be able to search new languages such as Mandarin, Russian, Hebrew and many others.
