Hi ribotb,

Thank you. That would be great.

Here is how this module work currently, it can be useful (it doesn't contain Microsoft recovery - this need separate decryption in different module).

<http://keit.co/p/wp-content/uploads/d...s/2014/02/rUniversal.txt>

for example

```
RegistryScan(HKEY_LOCAL_MACHINE, 'SOFTWAREEA Sports', ['Serial Number'],  
'Electronic Arts', @FormatEA);
```

```
RegistryScan(HKEY_LOCAL_MACHINE, 'SOFTWAREElectronic Arts', ['Serial Number'],  
'Electronic Arts', @FormatEA);
```

can retrieve about 80 products of Electronics Art (they using the same keyword "Serial Number")

btw i fixed office license recovery and made bigger window (should be better in French version).
