Hi ribotb,

Thank you. That would be great.

Hi Maciej,

I started to search in the registry the license keys of the softwares that does not appear in results of recCALL.

Here is a first set:

- **Jalbum** (JAlbum AB) : the license key is found in these two registry keys :

HKEY_CURRENT_USERSoftwareJavaSoftPrefssedatadosejalbum

HKEY_USERSS-1-5-21-... (my Windows account)SoftwareJavaSoftPrefssedatadosenalbum

"guid"=

"donate/Dialog/Last/Shown"=

"supress/Donate/Dialog/For"="9.6.1"

"pro/License/Dialog/Last/Shown"=

"supress/Pro/License/Dialog/For"="10.10.7"

"username"=

"uic"= **license key is here**

"valid/License"="true"

"license"="standard"

"license/Users"="1"

"license/Version"="11"

- **1AVShare** (PCWinSoft): it seems (because the values of these keys are empty, although having entered my license key) that license key is in these three registry keys :

HKEY_CURRENT_USERSoftwarePCWinSoft1AVShareRegInforeginfo

HKEY_CURRENT_USERSoftwarePCWinSoftSystemReset1AVShareRegInforeginfo

HKEY_USERS-1-5-21-... (my Windows account)SoftwarePCWinSoft1AVShareRegInforeginfo

HKEY_USERS-1-5-21-... (my Windows account)

SoftwarePCWinSoftSystemReset1AVShareRegInforeginfo

"name"=""

"serial"=""

"regcode"=""

"day"=dword:00000000

- **Audiograil**: the license key is found in these two registry keys :

HKEY_CURRENT_USERSoftwareKC SoftwaresAudioGrail >>
HKEY_USERSS-1-5-21-... (my Windows accountSoftwareKC SoftwaresAudioGrail
"Name"=
"Pass"= **license key is here**

- **TreeDBNotes** (SoftArtStudio), **Faststone Capture**, **TOWeb** (Lauyan Software) : recALL does not retrieve the license key and ME TOO!
) These license keys are not retrieved also by Belarc Advisor.

That's all for this time. I send you another set later.

Best regards,
Bernard
