hello ribotb,

moi j'ai retenu :

Recently Firefox has started blocking Downloads based on 'Safe Browsing' mechanism to prevent malicious downloads. But due to faulty implementation, this has resulted in Falsely Blocking of legitimate Download Files. From usability perspective, it is a useless feature as most of us already have antivirus on our system to get rid of those malicious files.

avec cet utilitaire, on peut donc "passer outre" l'interdiction imposée (statut) par FF
