Changes in Sonic Visualiser 2.5 since the previous release 2.4.1:

- Add unit-converter dialog, for converting between various pitch and timing units
- Fix failure to reload note layers from session file
- Use a more sensible scale for the play-speed dial
- Fix crash when importing very wide CSV files
- Fix generation of wrong layer type from some CSV files
- Fix failure to export last instant in a time-instant layer

Bonjour,

Et en français, ça donne quoi ?
