1) NTFS Access 2.4

NTFS Access can: set folder/file owner, set full access rights to a given folder/file, give permissions recursively.

2) Grant Admin Full Control v3.0

It helps user to gain ownership of files and folders which are restricted to the users or damaged file attributes for the ownership. Taking ownership of files or folders are easily accessible from the windows context menu of file or more easily possible to drag the file or folder to the program. Grant Access 3.0 requires administrator privileges to run.
