Ce menu là ne permet pas la désinstallation

Windows Update MiniTool :

Citation :

Check for updates

Download updates

Installing Updates

Deleting installed updates

Hiding unwanted updates

Get direct links to the *.cab / *.Exe / *.Psf update files

View update history

Configure Automatic Updates

This tool is like the external powershell module PSWindowsUpdate, but much more advanced and user-friendly features

The tool relies and use same WU infrastructure, all downloading are through WU -- it's not a downloader
