YUMI 2.0.6.1 est disponible :

<http://www.pendrivelinux.com/downloads/YUMI/YUMI-2.0.6.1a.exe>

Changements:

<http://www.pendrivelinux.com/yumi-multiboot-usb-creator/#Changelog>

Update to support newer Ubuntu and derivatives using initrd instead of initrd.lz,.gz, etc.
Include ability to see which Disk the drive letter is on. Improve DiskWipe option – rescan before creating a new partition.
