WuMgr (Update Manager for Windows) 0.9a

Changements:

Added

- Added Japanese translation thx @Rukoto
- Added Polish translation thx @Vitos
- Added select all checkbox

Fixed

- Fixed auto update crash issue
- Date formatting in last search for rupdate log
- Fixed date and size sorting issue in columns

Changed

- Now CTRL+F sets cursor to the search box
- Improved sorting, now sort order can be reversed by clicking again on the column
