LastActivityView 1.36 est disponible depuis le 8 octobre 2022.
La version 1.35 datait du 18 juillet 2019.

Version 1.36:
- Added 'Show Milliseconds In Time' option.

Version 1.35:
- Added 'Data Source' column, which displays the Registry key or filename where the activity information was found.
     Added 'Add Header Line To CSV/Tab-Delimited File' option (Turned on by default).

Version 1.32:
- Fix bug: On Windows 10/8 - In some folder names of 'View Folder in Explorer' items, LastActivityView omitted the first 2 characters.

Version 1.31:
- Added 'Task Run' action, which is displayed when a task was executed by the 'Task Scheduler' of Windows. (Works on Windows Vista or later)

Version 1.30:
- Added 'Quick Filter' feature (View -> Use Quick Filter or Ctrl+Q). When it's turned on, you can type a string in the text-box added under the toolbar and LastActivityView will instantly filter the actions list, showing only lines that contain the string you typed.

Version 1.27:
- You can now choose whether to read the archive log files (Options -> Read Archive Log Files)

Version 1.26:
- Added 'Sleep' action.

Version 1.25:
- LastActivityView now automatically reads archive log files (Archive-*.evtx) .
