Je viens de le réinstaller (v 0.8.0), et il affiche normalement l'interface, mais voici le message d'accueil:

ChatGPT is at  
capacity right now  
Get notified when we're back  
Write an acrostic poem about the status of ChatGPT.  
C: ChatGPT is currently down  
H: Huge demand has caused the site to crash  
A: All users will have to wait  
T: Time is needed for the servers to catch up  
G: Go grab a coffee and check back soon  
P: Patience is key in this situation  
T: Trust that the team is working hard to fix it up

Donc, patience...
