Version 2024.6.1 du 31 mai 2024
https://github.com/builtbybel/Winpilot/releases/tag/2024.6.1

https://github.com/builtbybel/Winpilot ... oad/2024.6.1/Winpilot.zip

Changelog :

   Clippy's Interactions Split: I separated Clippy's speech bubble from the assisted actions. Lots of users found the big bubble with buttons annoying, as it covered parts of the UI. Now, Clippy is less of a bother #215 #174
   Top-Bar Recommendations: Recommendations are now shown at the top, like what Microsoft's doing with the Settings app and Copilot
   Updated "assisted" Debloat Signatures for better performance
   Light/Dark Mode Toggle Moved: Now you can switch modes in the Settings/Three-dot menu
   Better Error Handling: Improved exception handling for those annoying startup errors when the UI frontend doesn't load, often because the Evergreen Bootstrapper for WebView2 is missing
