v 124.0.6367.245 Pre-release

<https://github.com/win32ss/supermium/releases/tag/v124>

(#645, #693) --disable-machine-id and --disable-encryption switches will no longer result in profile data loss. Furthermore a new switch named --revert-from-portable will allow the user to revert a portable user data directory to non-portable without data loss as well. Warning dialogs will appear if the latter switch is used as it is only to be used temporarily, and is to be disabled when the directory has been successfully moved.
