Le site est de retour en ligne avec une nouvelle version 4.1.1 à l'heure où j'écris ces lignes (c'était la version 4.1.0 cet après-midi :shock:).

Le programme est toujours un freeware:

[quote:48d9c1c6b5]PRODUCT INFORMATION

[...]

6. It is freeware, but it can/should be registered for further improvements.[/quote:48d9c1c6b5]

Mais l'auteur insiste fortement sur le fait que s'enregistrer permettra de futures améliorations, entre autres la copie directe:

[quote:48d9c1c6b5]If you want direct copy from CD/DVD and Audio, 100% UDF compatible and options to burn on multiple burners

at once you should register this program. This is the only way i can afford the components needed to make

those function work. Since version 4 there are now 16 peoples that has registered it. that is almost 320 \$.

The ammount we need is 1500\$. I will keep you updated on how much money we have once a week.

Thanks a lot to the peoples that have registered

Just remember all money donated or by registering

will ONLY be used on this burner. This is to make sure you get what you want, and to make the burner

much better![/quote:48d9c1c6b5]

Ce programme est absolument génial, à ne rater sous aucun prétexte!
