Une nouvelle offre promotionnelle de Paragon qui nous offre gratuitement jusqu'au 1er novembre le logiciel Paragon Exact Image 7 SE(sécial edition) gratuitement.

C'est un logiciel pour créer des images de ses partitions pour en faire des sauvegardes de son système.

Ces fonctions en anglais :

- o Friendly user interface. Easily understood icons accompany all functions of the program.

- o Easy-to-use wizards that provide the possibility to build up a reliable data protection system, and that even beginners may understand.

- o Backup an entire disk including service data of the file system.

- o Schedule the backup operation. The user can set a convenient time for the program to perform the operation automatically.

- o Create and manage the backup capsule. This is a special secured place on the disk where backup archives are stored.

- o Restore an entire disk or separate files from the disk archive (image).

- o Browsing disk archives with our special tool called Image Explorer.

- o Build external recovery media that help the user to restore the system even when the current operating system cannot boot anymore.
